PROFILE SUMMARY

Aspiring software engineer skilled in Python, SQL, and data visualization. Proficient in statistical analysis, machine learning, and Python libraries. Passionate about solving real-world problems and supporting business initiatives. Effective communicator for technical and non-technical audiences.

SKILLS

Programming Languages:	Python, C++, HTML, CSS, JavaScript
Libraries/Frameworks:	Pandas, Scikit-learn, OpenCV, NLTK, TensorFlow, PyTorch
Tools / Platforms:	MS Excel, MS PowerBI, Git, Gen AI
Database:	MySQL, MongoDB

EDUCATION

Savitribai Phule Pune University Artificial Intelligence & Data Science (B.E) GPA: 7.6	Pune, India Dec 2021 - May 2025
Narayana junior collage (PCM) Higher Secondary Certificate Percentage: 94%	Hyderabad, India June 2019 - July 2021
Keshavraj vidyalaya Degree in Secondary School Certificate Percentage: 92%	Latur March 2019

EXPERIENCE

Wisdom Sprouts Data Science Intern Identified, analyzed and interpreted trends in complex data sets using supervised and unsupervised learning techniques. Utilized programming language Python throughout the internship, applying relevant libraries and frameworks.	Pune, India Jan 2024 - Feb 2024
---	-----------------------------------

PROJECTS

Currency-Exchange-rate Fetches the latest exchange rates from an API and displays the conversion based on user input. Supports multiple currencies, displays country flags based on selected currencies.	JavaScript, HTML, CSS
Predicting-purchase-intentions-of-website-visitors Utilized machine learning and statistical analysis to predict purchase likelihood of website visitors. Analyzed user behavior data including browsing patterns and session duration.	Python, TensorFlow, Keras
RAG infused multimodal fake news detection using LLM sep 2024 - present	Python, deep learning, Gen AI

CERTIFICATIONS

- Career essentials in Data Analysis - **Microsoft**
- Introduction to Database & SQL - **Great learning**
- Introduction to GEN AI - **Google**
